**Flinders offers so many great opportunities to learn from experts in the field and to obtain first-hand experience in many hospitals across South Australia. There are plenty of experiences to get involved with; local and international projects as well as research. It has been great participating in various student committees and building partnerships with the Aboriginal, refugee, and environmental groups in the community. There are many opportunities and activities to expand your knowledge outside of medicine too!**

Please also note some courses may require students to purchase uniforms, clinical laboratory or workshop materials or equipment or undertake field trips at their own costs.

Administrative fees may also be charged for variations of enrolment such

as deferral, transfer of study, or reinstatement of enrolment. The University reserves the right to alter, amend or delete any course, fee, or entry requirement without prior notice.

† Offshore commencement allows you to progress your study ambitions while Australia's borders remain restricted. Some courses are available to complete fully online, but most have some topics that must be completed face to face. Where this is the case you may be required to undertake part time study, which will mean your total study duration will be longer than the standard advertised course length. If you complete all the topics available in online mode and still can't travel to Australia you will need to suspend your studies until travel becomes possible. We recommend you apply for a visa as soon as possible so you can travel to Australia when the restrictions are lifted. You must have access to a computer and stable internet to undertake offshore study. Details are available on the Hardware/Software page. Research students should discuss the suitability of their project for offshore commencement with the Office of Graduate Research. Offshore availability will be reviewed after 2022 in light of prevailing pandemic and border conditions.
